

Cordell Mining Report

Unearth all the information
you need

Accurate, timely information

Why the Cordell Mining Report is your business solution

If your company supplies, services or monitors the Australian mining industry, then the Cordell Mining Report provides the perfect solution for your information and business needs.

Use the Cordell Mining Report to:

- identify types and locations of mining projects on a regular basis.
- identify which companies are undertaking mining projects and the products and services they require to support those projects.
- identify the decision makers so you can contact the right people at the right time.
- save you and your salespeople's time by providing them with a continual supply of pre-qualified sales lead information.

The Cordell Mining Report is a constant supply of potential customers - customers who are actively looking for your products or services.

Weekly reports on the latest industry activity

Every week we'll provide you with information about the infrastructure of mining activity, such as treatment plants, dams, roads, pipelines, port installations, offices and accommodation.

Each mining report also provides you with:

- details of contracts and tenders available for associated works, such as waste processing, equipment supply, hire or maintenance, catering, transport etc.
- comprehensive details on the companies involved and the key contacts within these companies
- the details you need to take immediate action

Our information - your solution

Our Mining Report covers both private and government mining project activity, including open-cut, underground and offshore operations for coal, gold, copper, silver, lead, zinc, nickel, iron ore, diamonds, oil & gas and more.

In addition to the planning, tender and construction stages, the Cordell Mining Report also includes an earlier section devoted to exploration, drilling, geological survey and assessment work.

In fact, the Cordell Mining Report covers all aspects of mining activity:

- Geological survey and assessment
- Exploratory drilling
- Environmental Planning Authority applications and approvals
- Feasibility studies
- Budget pricing
- Development Approvals
- Design of mine sites
- Building construction planning
- Plant and equipment requirements
- Tenders available
- Contracts let
- Subcontracts available

The Coverage and delivery format

The Cordell Mining Report - published as the West Australia Mining Report and the East Australia Mining Report - is available in two formats:

- print - cards or bulletin format
- electronic - disk or email (with or without Cordell Acumen software) or online using Cordell Connect

The Cordell Mining Report - accurate, timely information

If your business supplies or services the mining industry, the Cordell Mining Report is a powerful source of new business and sales leads.

The Cordell Mining Report provides a constant supply of essential mining project information, giving full details of potential customers - customers who are actively looking for your products and services.
