

Cordell® e-Costing

Cordell e-Costing – the smarter, quicker, more flexible way to access building cost information

Need access to the most up-to-date building cost information and the ability to perform quick calculations, with the flexibility of access from any location, 24 hours a day, 7 days a week?

Our entire range of Building Cost Guides can now be accessed via the Internet with a few simple clicks of your mouse using Cordell e-Costing.

Wherever you are, any time of the day or night, you can access the power of a Cordell Building Cost Guide database with the ease of the Internet, allowing you to do basic calculations quicker and easier than ever before.

Cordell e-Costing checklist:

- Access to the latest Cordell Building Cost Guide rates from any location 24 hours a day.
- Put a simple estimate together on the fly, using your FREE Cordell calculator.
- Use Cordell prices, your own prices or a mixture of both.
- Easy to use interface – if you have access to a PC and Internet Explorer 5.5 or above, quick cost checks and calculations are just a few clicks away!
- Immediate price alerts each time you log into one of your job calculations that tell you when a price has been updated within our database.

Category	Qty	Unit	Price	Total
General Building	1	sqm	100.00	100.00
Roofing and cladding	1	sqm	100.00	100.00
Structural steelwork	1	sqm	100.00	100.00
Total				422,000

- No complicated installation and set-up routine and no messy hardware or software configuration to manage on your end – you just log on and start working.
- Storage of up to 50 basic job calculations in one convenient place and quick retrieval with the click of a mouse.
- Job template facility that lets you set-up standard calculations for 'typical' projects. Each time you have one of these jobs, you can then copy from one of your templates - saving you valuable time!
- The functionality required to record client contact details for a job enabling future contact and follow up.
- The knowledge that your valuable data is completely safe and continuously backed up, meaning no more frustrating data loss or time consuming computer administration issues.
- Three easy ways to print your job calculations quickly.
- A simple to use export option that allows you to transfer job calculations to Microsoft Excel, which gives you the flexibility to further manipulate the data or import it into other applications.
