

Computer Estimator Training

Sharpen Up Your Computer Estimating Skills

For more than 35 years we have been producing costing information for the Australian building industry, and for the last 15 years this information has been available electronically. Our Costing databases combined with our easy to use online estimating facility provide you with the total estimating solution.

Maximise Your Investment

Now to help you make the most of these great estimating tools, Reed Construction Data invites you to participate in a new range of training courses that will help you make the most of your database investment.

Each course is designed to give you a range of skills and expert tips that you will be able to put into practice straight away. No highbrow theory or useless padding - just good, practical, hard-nosed advice that will get you estimating quickly and easily.

A Range Of Options

We offer a range of courses, venues and dates to suit most situations. Or if you are interested in some special corporate training, we can accommodate that too.

Cordell Training Checklist

- Learn how to operate the Cordell Estimator software and pricing databases.
- See how you can manipulate Cordell prices to suit any situation.
- Generate a job estimate quickly and easily.
- Control your costs and generate additional profits.
- Add your own information and produce a powerful database to use in future estimates.
- Generate a range of flexible custom MS Word reports.
- Learn to use the powerful export facility to send your estimate to MYOB, Quickbooks or MS Office programs such as Excel.
